FOR IMMEDIATE RELEASE

APRIL 7, 2009

**HARRISON DESIGN ASSOCIATES HONORED
FOR THEIR WORK WITH TEA FIRE VICTIMS**

Santa Barbara, California On April 2, 2009 The Mountain Drive Community Association of Santa Barbara honored two Harrison Design Associates' employees with Phoenix Awards for their efforts on behalf of victims of the November 2008 Tea Fire.

Adele Goggia and Barbara Lowenthal of Harrison Design Associates were honored with the Mountain Drive Community Association's Phoenix Award on April 2, 2009 at the closing of the Tea Fire Relief Center. For the past three months, the center provided computers with Internet access so fire survivors could research "insurance options, find housing, connect with FEMA and get information about what the rebuilding process would involve," said Goggia.

Harrison Design Associates' Adele Goggia's office temporarily relocated from HDA's St. Vincent Avenue campus to a trailer at Cold Spring School, after fire destroyed over 200 homes in the community. Goggia, an expert in planning, volunteered her time to help the fire victims navigate their way through the planning and building process, but instead, found herself in the middle of disaster relief. According to one victim, the center, "was a safety net for those reeling from the loss, shoring up survivors until we can walk on our own."

Phoenix Awards were also given to those in the community who were instrumental in the Relief Effort.

On November 13, 2008, the fire ignited in an historic 1920s Tea Garden, raged for days and destroyed 230 homes, seriously injured two people and scorched 2000 acres in the Montecito foothills.

Since its founding in 1991, award-winning Harrison Design Associates has been dedicated to creating high-end custom residences, town homes and specialty commercial projects that are inspired by the best of traditional architecture. From offices in Atlanta and St Simons, Georgia and Santa Barbara and Beverly Hills, California, the team of over 85 professionals creates an array of distinctive ancestral homes and public buildings through the thoughtful study and application of classical proportions and detailing.
